

INFO:

Login password required

Process of Solving:

Found script in HTML code:

```
<!--
```

```
password=prompt("Please enter the Password!","");  
var pasword= "hax0r";
```

```
if (password=="Sauc3") {  
window.location.href="http://challenges.enigmagroup.org/basics/js/3/"+password+".php";  
}  
//-->
```

Writeup:

Congratulations on beating the mission again.

No credits were rewarded, but it's good to see you're testing your skills again.

Return to Enigma Main

You obviously have learned that both HTML and JavaScript ignore whitespace and newlines.

Whitespace includes Tabs, Spaces, and Newlines.

This is why the password was hidden many lines down at the bottom of the page and the code still ran just fine and the comment at the beginning of the source code did not fool you either. ;)

A comment in HTML is denoted by the following.

```
<!-- Whatever Text you do not want to appear in your web site but you want to be in your source code -->
```

Comments are used by programmers to make there parts of their code easier to understand for other developers.

While comments are not necessary for a program to run, it is considered good programming practice to comment the code you write.
