## [Task 1] Introduction

### [OWASP Top 10 - A challenge everyday for 10 days]

Learn one of the OWASP vulnerabilities every day for 10 days in a row.  
A new task will be revealed every day, where each task will be independent from the previous one.  
These challenges will cover each OWASP topic:

- Day 1) **Injection**
- Day 2) **Broken Authentication**
- Day 3) **Sensitive Data Exposure**
- Day 4) **XML External Entity**
- Day 5) **Broken Access Control**
- Day 6) **Security Misconfiguration**
- Day 7) **Cross-site Scripting**
- Day 8) **Insecure Deserialization**
- Day 9) **Components with Known Vulnerabilities**
- Day 10) **Insufficient Logging & Monitoring**

The challenges are designed for beginners and assume no previous knowledge of security.

#1

Read the above.

**No answer needed**

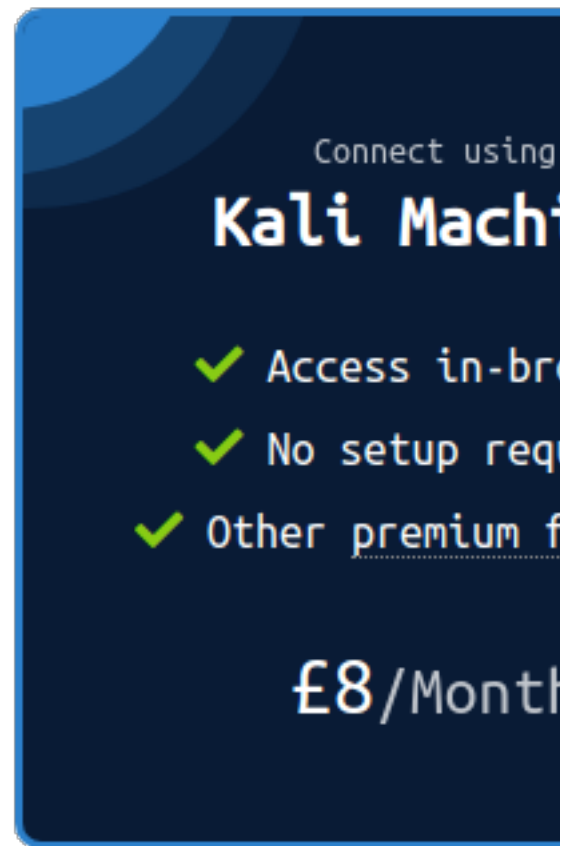

## [Task 2] Accessing machines

Some tasks will have you learning by doing, often through hacking a virtual machine.

However, to access these machines you need to either:

OpenVPN	Kali Machine
Connect using OpenVPNFollow the guide here to connect using OpenVPN.	Use an in-browser Linux MachineIf you're subscrib machine!

#1

Practise connecting to our network.

No answer needed

### [Task 3] Daily Prizes

**Completing tasks gives you the opportunity to win prizes.**

**1 day after each challenge, we will randomly select a winner by picking a user who has completed the previous days challenge.**

**#1**

Read the above.
