

So many 64s

So Many 64s

Help! My friend stole my flashdrive that had the flag on it.
When he gave it back the flag was changed!
Can you help me decrypt it?

<https://mega.nz/#!OHhUylqA!H9WxSdG1O7eVcCm0dffggNB0-dBemSpBAXiZ0OXJnLk>

Flag: CTFLearn{pr3tty_b4s1c_r1ght?}

Writeup:

created Python script since length of string was overwhelming basic decoders.

```
#!/usr/bin/python3
import base64

file = open('/home/taj702/Downloads/flag.txt', 'r')
hash1 = file.read()

while True:
    hash1 = base64.b64decode(hash1).decode('utf-8')

    if '{' in hash1:
        print(hash1)
        break
```
