

# Character Encoding

## Character Encoding

In the computing industry, standards are established to facilitate information interchanges among American coders. Unfortunately, I've made communication a little bit more difficult. Can you figure this one out?

hex to ascii:

41 42 43 54 46 7B 34 35 43 31 31 5F 31 35 5F 55 35 33 46 55 4C 7D

Flag: CTFLearn{45C11\_15\_U53FUL}
