

AudioEdit

AudioEdit

I made this cool site for editing audio files. Can you exploit it?
<http://web.ctflearn.com/audioedit/>

Flag: CTFlearn{m3t4_inj3cti00n}

Writeup:

tried LFI unsuccessfully with `https://web.ctflearn.com/audioedit/edit.php?file=../../../../../../../../etc/passwd`
then tried PHP file upload but only mp3's are allowed to be uploaded
discovered a SQL injection vulnerability
discovered audio file called `supersecretflag1le.mp3` in database
opened that file in the editor and switched view to sonogram mode to get flag
`ABCTF{m3t4_inj3cti00n}`
